

# ***SPE Production & Operations***

**Vol. 37 // No. 4      November 2022**

586–602

SPE-210557-PA      (Direct to Peer)

**Design of Steam Alternating Solvent Process Operational Parameters Considering Shale Heterogeneity**

Z. Ma, L. Coimbra, and J. Leung

603–615

SPE-209832-PA      (Direct to Peer)

**Electrical Submersible Pump Design Enhancements for Hydrogen Sulfide Harsh Environments**

M. Al-Khalifa, R. Pessoa Rodrigues, and D. Sinclair

616–631

SPE-205988-PA

**Scale Buildup Detection and Characterization in Production Wells by Deep Learning Methods**

J. Cheng, D. Mao, M. Salamah, and R. Horne

632–653

SPE-210565-PA      (Direct to Peer)

**Intelligent Approach for Gas-Oil Separation Plant Oil Recovery Enhancement**

A. AL-Dogail, R. Gajbhiye, M. AlNaser, A. AlNajim, and M. Mahmoud

654–663

SPE-209799-PA      (Direct to Peer)

**Airborne Trace Gas Remote Sensing and Surface Mobile In Situ: A Novel Tool for the Study of Structural Geological Controls from a Producing Oil Field**

I. Leifer, C. Melton, D. Tratt, and K. N. Buckland

664–680

SPE-209817-PA      (Direct to Peer)

**Mechanical Characteristics of Cluster Perforation String under Running Process in Horizontal Wells with Unconventional Oil/Gas Reservoirs**

X. Guo, J. Liu, Z. Du, K. Tang, D. Cao, and Z. He

681–697

SPE-210573-PA      (Direct to Peer)

**Effects of Altering Perforation Configurations on Proppant Transport and Distribution in Freshwater Fluid**

S. Alajmei and J. Miskimins

698–709

SPE-209159-PA

**Lessons Learned from the Large-Scale CO<sub>2</sub> Stimulation of 11 Unconventional Wells in the Williston Basin: A Practical Review of Operations, Logistics, Production Uplift, and CO<sub>2</sub> Storage**

L. Ribeiro, A. Thoma, J. Bryant, D. Sundararajan, and W. Zurovec

710–720

SPE-209825-PA (Direct to Peer; Open Access)

**Online Monitoring of Inner Deposits in Crude Oil Pipelines**

R. Giro, G. Bernasconi, G. Giunta, and S. Cesari

721–733

SPE-210584-PA

**Physical Testing of a High-Speed Helicoaxial Pump for High Gas Volume Fraction Operation**

C. Ejim, J. Xiao, W. Lee, and W. Zabala

734–747

SPE-206115-PA

**Efficient Water Softening in Heavy Oil Steamflood Operations**

P. Prakash, R. Concienne, T. Demayo, and K. Towne

748–761

SPE-210591-PA

**Pressure Transient Behaviors of Discretely Fractured Reservoirs Using a Numerical Discrete Fracture Model**

Z. Chen, B. Zhou, S. Zhang, and W. Yu

762–766

SPE-206333-PA

**Mitigating Water Production from High Viscosity Oil Wells in Unconsolidated Sandstone Formations**

H. Al-Rashidi, M. Reda Hussein, A. Erhamah, S. Malik, A. AL-Hajri, N. Salehi, G. Omonte Rossi, A. Zaitoun, and D. Almeida

***Preprint Correction Notice***

---

SPE-212284-PA

**Artificial Neural Network Model to Predict Production Rate of Electrical Submersible Pump Wells**

A. Sabaa, M. Abu El Ela, A. H. El-Banbi, and M. H. M. Sayyoub

A correction notice has been issued to make readers aware of errors in the paper discovered after online preprint publication on 7 September 2022. The errors were found in Fig. 7 and Table 2 and are detailed at <https://doi.org/10.2118/212284-PA>.

# Editorial Notes

## Style Guide Update 2022

The SPE Style Guide for Technical Publications (conference papers, journals, books, and reports) has been updated. This guide has been streamlined and simplified to make our style easier to understand and follow for both authors and editors. The new guide, which mainly follows the [Chicago Manual of Style](#) consists of a list of exceptions to Chicago style and a collection of helpful appendices including spelling of common terms, units, and reference styling. The new guide can be found under [Author Resources](#) on the SPE website.

## 2022 Outstanding Technical Reviewer Awards

Every year, SPE recognizes members who have made an exceptional effort to ensure the technical excellence of the Society's peer-reviewed journals. For their contributions, the following individuals are recipients of the 2022 Outstanding Technical Reviewer Award for *SPE Production & Operations*:

**Chris Daeffler**, Schlumberger

**Eric Delamaide**, IFP Technologies Canada

**Xuyang Guo**, University of Petroleum China-Beijing

**Youwei He**, Southwest Petroleum University

**Sarvesh Naik**, Chevron

**Raja Ramanathan**, Texas A&M University

**Sajjaat Muhemmed Reyath**, Clariant Oil Services

**Michael Romer**, ExxonMobil

**Martin Rylance**, BP Exploration

**Thomas Van Akkeren**, Production Technology Associates

**Jonathan Wylde**, Clariant Oil Services

**Jianjun Zhu**, University of Petroleum China-Beijing
