

SPE Reservoir Evaluation & Engineering

Vol. 26 // No. 1 February 2023

Well Logging, Petrophysics, and Formation Evaluation

1–14

SPE-201519-PA

Simultaneous Assessment of Wettability and Water Saturation Through Integration of 2D NMR and Electrical Resistivity Measurements

Z. Azizoglu, A. Posenato Garcia, C. Newgord, and Z. Heidari

15–22

SPE-205926-PA

Fluid Identification Derived from Formation Chlorine Measurements and Reservoir Characterization of Tight Carbonate in Sichuan Basin, China

Y. Wang, X. R. Zhao, and K. X. Li

23–39

SPE-206109-PA

Electrical, Diffusional, Hydraulic, and Geometrical Tortuosity Anisotropy Quantification Using 3D Computed Tomography Scan Image Data

A. Gonzalez, Z. Heidari, and O. Lopez

Experimental Research, Theory, and Core Studies/Analysis

40–50

SPE-212276-PA (Direct to Peer; includes Supplemental Materials)

Shale Wettability: Untangling the Elusive Property with an Integrated Imbibition and Imaging Technique and a New Hypothetical Theory

S. Peng, P. Shevchenko, and L. T. Ko

Unconventional Resource/Reservoir Studies, Enhanced Recovery, and Modeling

51–63

SPE-210567-PA (Direct to Peer; includes Supplemental Materials)

Water Imbibition and Oil Recovery in Shale: Dynamics and Mechanisms Using Integrated Centimeter-to-Nanometer-Scale Imaging

S. Peng, J. LaManna, P. Periwal, and P. Shevchenko

64–74

SPE-210599-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

Broad Ion Beam–Scanning Electron Microscopy Characterization of Organic Porosity Evolution During Thermal Treatment of Bazhenov Shale Sample

T. Karamov, E. Leushina, E. Kozlova, and M. Spasennykh

Improved Oil Recovery, Waterflooding, and Phase Behavior

75–87

SPE-209688-PA

Oil Recovery by Low-Rate Waterflooding in Low-Permeability Water-Wet Sandstone Cores

P. Aslanidis, S. Strand, T. Puntervold, K. K. Yeboah, and I. Souayah

88–98

SPE-200182-PA

Catanionic Surfactants for Improving Oil Production in Carbonate Reservoirs

L. Xu, M. Han, D. Cao, and A. Fuseni

Enhanced Oil Recovery, Heavy Oil, and CO₂ Applications

99–121

SPE-206010-PA (includes Supplemental Materials)

An Extended Unified Viscoelastic Model for Predicting Polymer Apparent Viscosity at Different Shear Rates

M. Zeynalli, E. W. Al-Shalabi, and W. AlAmeri

122–138

SPE-212268-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

New Insights into the Understanding of In-Situ Combustion: Important Considerations When Modeling the Process

D. Gutierrez and D. G. Mallory

139–151

SPE-212267-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

Athabasca Toe-to-Heel Air Injection Pilot: Evaluation of the Spontaneous Ignition Based on Apparent Atomic Hydrogen-Carbon Ratio Variation

A. Turta, R. Sierra, M. Islam, and A. Signhal

152–166

SPE-212266-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

Progress Toward Pilot-Scale Simulation of In-Situ Combustion Incorporating Geomechanics

Y. Li, E. J. Manrique, and A. R. Kavscek

167–179

SPE-212270-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

Comparative Study of In-Situ Combustion Tests on Consolidated and Crushed Cores

A. G. Askarova, E. Y. Popov, K. V. Maerle, and A. N. Cheremisin

180–189

SPE-210606-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

In-Situ Combustion: Myths and Facts

S. Sur

190–197

SPE-210600-PA (Direct to Peer; In-Situ Combustion Thermal Recovery: A Tribute to Professor Gordon Moore)

Methods to Enhance Success of Field Application of In-Situ Combustion for Heavy Oil Recovery

T. Harding

Editorial Notes

SPE Reservoir Evaluation & Engineering covers a wide range of topics, including geology and geophysics, core analysis, SCAL, petrophysics, well log interpretation, fracture detection, rock mechanics, well testing, pressure-transient analysis, geostatistics, reservoir characterization, well productivity, petroleum economics, uncertainty/risk assessment, information management, digital energy (as it relates to big data and analytics), IOR/EOR field studies, immiscible and miscible flooding, thermal recovery, waterflooding, pilot test interpretation, tracer studies, phase behavior, PVT analysis, reservoir management, performance prediction, reservoir simulation, resource and reserve evaluation, portfolio/asset management, and project valuation.

Editor-in-Chief: Birol Dindoruk, University of Houston

Executive Editor (Formation Evaluation): Silviu Livescu, The University of Texas at Austin

Executive Editor (Reservoir Engineering): Subhash Ayirala, Saudi Aramco

Time to First Decision: 23 days

Impact Factor: 2.672

CiteScore: 6.0

Scopus Rank: #40/273 (85th Percentile)

Category: Geology

Dr. Silviu Livescu has joined the *SPE Reservoir Evaluation & Engineering* Editorial Board as an Executive Editor– Formation Evaluation. He is currently with The University of Texas at Austin, after having a successful technical career in the oil and gas industry, most recently as the pressure pumping chief scientist at Baker Hughes. Silviu has extensive hands-on experience related to multi-disciplinary research, development and technology deployment, diversified innovation, and intellectual property applied to several hydrocarbon and geo-energy engineering technical disciplines (geothermal energy, direct air capture, carbon sequestration, underground thermal storage), with focus on well engineering and operations (monitoring and telemetry systems, well intervention, stimulation, construction, production, and data science and engineering analytics). He has authored 38 US patents and many papers and articles and has been involved in the peer review of more than 11,000 papers and articles. Silviu is an SPE Distinguished Member and the 2020-23 SPE Data Science and Engineering Analytics Technical Director. He is strongly committed to helping solve some of the most impactful energy transition problems for a sustainable, reliable, and affordable energy future.

ORCID iD

Starting January 2023, SPE will require authors and co-authors to use an ORCID number to submit papers to conferences and journals. ORCID, Open Researcher and Contributor ID, is a widely accepted unique identifier for researchers/authors that allows authors to own and control their content and distinguishes authors from every other researcher.

Add your ORCID iD by going to your user profile in ScholarOne and selecting the "Email/ Name" page. Learn more at <https://www.spe.org/en/authors/resources/orcid/>.

Thank You to Our 2022 Reviewers

SPE Reservoir Evaluation & Engineering extends its sincere appreciation to everyone who provided a technical review for at least one paper during 2022. Many of our reviewers contributed their expertise to more than one paper during the year. We recognize the time commitment these individuals have made in agreeing to review papers and appreciate the impact that their efforts have had on the published papers throughout the year. Volunteers such as these individuals are essential to ensuring that the journal publishes manuscripts of high quality and lasting value. Thank you to our dedicated reviewers for their contributions.

Editor-in-Chief:

Birol Dindoruk, University of Houston

Executive Editors:

Subhash Ayirala, Saudi Aramco

Silviu Livescu, The University of Texas at Austin

Turhan Yildiz, Red Rocks Engineering

Associate Editors:

Emad Al-Shalabi, Khalifa University of
Science and Technology

Abdulkareem Alsofi, Saudi Aramco

Michael Altunbay, Petronas

Anil Ambastha, Chevron

Elizabeth Barsotti, MRC Laboratory
of Molecular Biology

Bailian Chen, Los Alamos National Laboratory

Peter Clifford, BP Exploration (retired)

Steven Crary, Schlumberger (retired)

Aysegul Dastan, Chevron

Eric Delamaide, IFP Technologies Canada

Adolfo D'Windt, Kuwait Oil

Selin Erzeybek, ConocoPhillips

Rick Gibson, Halliburton

Kirk Hansen, Shell (retired)

Byron Haynes, North Caspian Operating

Dimitrios Hatzignatiou, University of Stavanger

Zoya Heidari, The University of Texas at Austin

Hosein Kalaei, ConocoPhillips

Seung Kam, Louisiana State University

David Kersey, Saudi Aramco (retired)

Josselin Kheroubi, Schlumberger

Catherine Laureshen, Shell Canada
(Special Issue Guest Editor)

Liang Lin, Schlumberger

Hui-Hai Liu, Aramco Services

Hassan Mahani, Shell

Hadi Nasrabadi, Texas A&M University

Sheng Peng, The University of Texas at Austin

Aymeric-Pierre Peyret, The University of
Texas at Austin

Bo Ren, The University of Texas at Austin

Jasper Ring, Chevron

Vijay Shrivastava, Computer Modelling Group

Gary Teletzke, ExxonMobil (retired)

Diederik van Batenburg, Shell

Kan Wu, Texas A&M University

Chicheng Xu, Aramco Services

Calvin Yao, Occidental Petroleum

Harvey Yarranton, University of Calgary

Andres Yrigoyen, Frontender

Mehdi Zeidouni, Louisiana State University
