Prediction Model for Morphological Distribution and Evolution of Submarine Cuttings Piles in Offshore Drilling
Z. Zhang, B. Sun, Z. Wang, S. Tong, B. Guo, and K. Du

Buoyancy Force on a Plain or Perforated Portion of a Pipe
E. Cayeux, S. Stokka, E. W. Dvergsnes, and J. L. Thorogood

Application of Artificial Intelligence To Predict Time-Dependent Mud-Weight Windows in Real Time
D. T. Phan, C. Liu, M. J. AlTammar, Y. Han, and Y. N. Abousleiman

Proppant Transport Using High-Viscosity Friction Reducer Fracture Fluids at High-Temperature Environment
G. Biheri and A. Imqam

Numerical Study on Proppant Transport in Hydraulic Fractures Using a Pseudo-3D Model for Multilayered Reservoirs
X. Zhang, L. Yang, D. Weng, Z. Wang, and R. G. Jeffrey

Feasibility Study of Fracture Propagation Controlled by Use of Managed Pressure Drilling during Laser-Assisted Drilling Operation
S. Chamankhah, M. Bazargan, A. Forouzandeh, and S. Riahi

A Novel Branched Polymer Gel System with Delayed Gelation Property for Conformance Control
T. Song, Q. Feng, T. Schuman, J. Cao, and B. Bai
Is Titanium Drillpipe Applicable to Offshore Drilling? A Question from a Corrosion Fatigue Perspective  
H. Yu, Y. Mou, Z. Lian, and Q. Zhang

Efficient Drilling Sequence Optimization Using Heuristic Priority Functions  
Z. Wang, J. He, S. Tanaka, and X.-H. Wen

Combined Control Mechanism of Weight on Bit and Rate of Penetration with a Downhole Robot in the Coiled-Tubing Drilling Process  
J. Zhao, S. Han, Q. Liu, Y. Zhang, X. Xiao, R. Dong, S. Fang, and C. Tu

An Analytical Model for Predicting Temperature Fields during Fluid Circulation in a Deep-Sea Well  
L. Zhang, B. Wu, X. Zhang, and Z. Zhang

Solid-Free Flexible Colloidal Completion Fluid with Variable Density for Gas Well Completion in High-Temperature and High-Pressure Reservoirs: Experimental Study and Pilot Test  
H. Jia, C.-C. Niu, and C.-L. Dai

Effect of Stress Shadow Caused by Multistage Fracturing from Multiple Well Pads on Fracture Initiation and Near-Wellbore Propagation from Infill Wells  

Data Analytics Applications

Deep Reinforcement Learning for Generalizable Field Development Optimization  
246–273
SPE-203960-PA  (Direct to Peer; 2021 SPE Reservoir Simulation Conference Special Issue; includes preprint errata)
**Biobjective Optimization of Well Placement: Algorithm, Validation, and Field Testing**
F. Alpak, V. Jain, Y. Wang, and G. Gao

274–291
SPE-206733-PA  (Direct to Peer)
**The Investigation of Proppant Particle-Fluid Flow in the Vertical Fracture with a Contracted Aperture**
H. Qu, R. Wang, X. Ao, L. Xue, Z. Liu, and H. Lin

292–306
SPE-206722-PA  (Direct to Peer)
**Estimating Reservoir Properties from 3D Seismic Attributes Using Simultaneous Prestack Inversion: A Case Study of Lufeng Oil Field, South China Sea**
Q. Wu, Q. Liu, S. Liu, S. Wang, J. Yu, W. B. Ayers, and Q. Zhu

307–328
SPE-206755-PA  (Direct to Peer)
**Surrogate-Assisted Multiobjective Optimization of a Hydraulically Fractured Well in a Naturally Fractured Shale Reservoir with Geological Uncertainty**
H. Zhang and J. J. Sheng

329–348
SPE-204008-PA  (2021 SPE Reservoir Simulation Conference Special Issue)
**Strategies to Enhance the Performance of Gaussian Mixture Model Fitting for Uncertainty Quantification**
G. Gao, J. Vink, F. Saaf, and T. Wells

349–363
SPE-208586-PA  (Direct to Peer; includes Supplementary Materials)
**Explainable and Interpretable Anomaly Detection Models for Production Data**

364–380
SPE-203971-PA  (2021 SPE Reservoir Simulation Conference Special Issue)
**An Efficient Bi-Objective Optimization Workflow Using the Distributed Quasi-Newton Method and Its Application to Well-Location Optimization**
Y. Wang, F. Alpak, G. Gao, C. Chen, J. Vink, T. Wells, and F. Saaf
An Experimental Study of Steam-Solvent Coinjection for Bitumen Recovery Using a Large-Scale Physical Model
K. Sheng, R. Okuno, A. Al-Gawfi, P. Nakutnyy, M. Imran, and K. Nakagawa

Effect of Flue Gas on Steam Chamber Expansion in Steamflooding
T. Lu, Z. Xu, X. Ban, D. Peng, and Z. Li

A Comprehensive Investigation into the Effect of a Low Surface Energy Treatment on Gas Hydrate, Asphaltene, and Wax Formation, Deposition, and Adhesion

Permeability Analysis of Hydrate-Bearing Porous Media Considering the Effect of Phase Transition and Mechanical Strain during the Shear Process

Geomechanical Response Induced by Multiphase (Gas/Water) Flow in the Mallik Hydrate Reservoir of Canada
Y. Xia, T. Xu, Y. Yuan, X. Xin, and H. Zhu

Geomechanics and Poroelasticity

A Novel Multiphysics Multiscale Multiporosity Shale Gas Transport Model for Geomechanics/Flow Coupling in Steady and Transient States
Z. Li, Y. Teng, M. Fan, N. Ripepi, and C. Chen

Tensile Failure and Fracture Width of Partially Permeable Wellbores with Applications in Lost Circulation Material Design
K. Nguyen, A. Mehrabian, A. Santra, and D. Phan
Wellbore Integrity: An Integrated Experimental and Numerical Study to Investigate Pore Pressure Variation during Cement Hardening under Downhole Conditions
W. Zhang, A. Eckert, S. Hilgedick, H. Goodman, and M. Meng

Production and Facilities Engineering

A Robust Short-Term Oil Production under a Bow-Tie Uncertainty Set for the Gas Lift Performance Curve
A. Ramos, C. Gamboa, D. Valladão, B. K. Pagoncelli, T. Homem-de-Mello, B. Vieira, T. Gutierrez, and A. Teixeira

Gas/Liquid Two-Phase Flow in Pipes: Slugs, Classical Flow-Map, and 1D Compositional Simulation
L. Raimondi

A New Analytical Approach To Calculate a Slippage inside a Progressing Cavity Pump with a Metallic Stator Using a Middle Streamline and a Structural Periodicity
I. L. Om, U. C. Han, S. I. Ryo, C. Y. Kim, and Y. N. Sol

Reservoir Modeling and Simulation

An Adaptive Sequential Fully Implicit Domain-Decomposition Solver
Ø. S. Klemetsdal; A. Moncorgé; H. M. Nilsen; O. Møyner; K.-A. Lie

Characterization and Analysis of Anisotropic Relative Permeability
X. Pei, Y. Liu, W. Gu, and C. Jian
A Graphics Processing Unit–Based, Industrial Grade Compositional Reservoir Simulator
K. Esler, R. Gandham, L. Patacchini, T. Garipov, A. Samardzic, P. Panfili, F. Caresani, A. Pizzolato, and A. Cominelli

A New Nonlinear Two-Point Flux Approximation Method for Solving the Anisotropic Diffusion Equation with Reduced Violations of the Discrete Maximum/Minimum Principle
W. Zhang and M. Al Kobaisi

A Fast Gridding Method for Capturing Geological Complexity and Uncertainty
Y. Xu, P. Srivastava, X. Ma, K. Kaul, and H. Huang

Scalable Graphics Processing Unit–Based Multiscale Linear Solvers for Reservoir Simulation
A. M. Manea and T. Almani

Aspects of Multiscale Flow Simulation with Potential to Enhance Reservoir Engineering Practice
S. K. Khataniar, D. de Brito Dias, and R. Xu

Reservoir Evaluation and Engineering

A Novel Method To Assess Stimulation of Sandstone Cores Damaged by Fines Migration
A. Hanafy, H. A. Nasr-El-Din, and Z. Heidari

Core-Derived Velocity Systematics, Mississippian Meramec Formation, Oklahoma
J. Fu, C. Sondergeld, and C. Rai
Adaptation of Crushed Rock Analysis to Intact Rock Analysis To Improve Assessment of Water Saturation and Fast Pressure Decay Permeability
K. Cheng, J. A. Zumberge, S. E. Perry, P. M. Lasswell, and T. Vodo

**EOR/IOR Applications**

Geochemical Modeling of Hybrid Surfactant and Engineered Water Injections in Carbonate Reservoirs under Harsh Conditions
A. Adila, E. W. Al-Shalabi, and W. AlAmeri

Experimental Investigation of Trapped Oil Mobilization with Ferrofluid
N. Wang, Y. Liu, L. Cha, M. T. Balhoff, and M. Prodanović

Primary Evaluation of a New Green Synthesized Anionic Surfactant, Micellar Behavior Analysis, and Flooding in Sandstone Reservoirs: Application in Chemical Enhanced Oil Recovery
A. Nafisifar, A. K. Manshad, and S. R. Shadizadeh

Experimental Study of Transport Behavior of Swellable Microgel Particles in Superpermeable Channels for Conformance Control
Y. Zhao and B. Bai

Risk Assessment and Field Case Study on Oil/Natural Gas Explosion during High-Pressure Air Injection Process
L. Huang, Y. Wang, L. Zhang, S. Pei, Z. Zhang, Y. Su, and S. Ren

An Experimental Study of Improving Viscous Oil Recovery by Using Hybrid Enhanced Oil Recovery Techniques: A Case Study of Alaska North Slope Reservoir
Y. Cheng, Y. Zhang, A. Dandekar, and J. Li
Injectivity and Potential Wettability Alteration of Low-Salinity Polymer in Carbonates: Role of Salinity, Polymer Molecular Weight and Concentration, and Mineral Dissolution
M. Souayeh, R. S. Al-Maamari, A. Mansour, M. Aoudia, and T. Divers

PVT and Fluid Characterization

Application of Synthesized Novel Biodegradable Pour-Point Depressant from Natural Source on Flow Assurance of Indian Waxy Crude Oil and Comparative Studies with Commercial Pour-Point Depressant
B. Pal and T. K. Naiya

Asphaltene Thermodynamic Precipitation during Miscible Nitrogen Gas Injection
M. Elturki and A. Imqam

Highly Efficient and Accurate Gas-Alkane Binary Mixture Interfacial Tension Equations for a Broad Range of Temperatures, Pressures, and Compositions
Y. Wang, N. Shardt, J. A. W. Elliott, and Z. Jin

CO₂ Sequestration Applications

Complete Equation of State Thermal Formulation for Simulation of CO₂ Storage
A. Moncorgé, M. Petitfrère, and S. Thibeau
Editorial Notes

*SPE Journal* covers novel theories and emerging concepts (not including review articles or multi-part articles) spanning all aspects of engineering for oil and gas exploration and production, including drilling and completions, geomechanics, production and facilities, oilfield chemistry, CO₂ sequestration and injection, reservoir evaluation and engineering, numerical simulation, data analytics, economics and externalities including health, safety, environment, and sustainability.

**Editor-in-Chief:** Birol Dindoruk, University of Houston  
**Executive Editors:** Reza Fassihi, BHP Billiton; Luis Ayala, Pennsylvania State University; and Saeid Khorsandi, Chevron  
**Time to First Decision:** 29 days  
**Impact Factor:** 3.478  
**CiteScore:** 7.8  
**Scopus Rank:** #12/195 (98th Percentile)  
**Category:** Geotechnical Engineering and Engineering Geology

The *SPE J.* editorial board and staff thank outgoing executive editor Dr. Roberto Aguilera, University of Calgary, for his invaluable service to the journal and welcome Dr. Saeid Khorsandi as incoming executive editor. Dr. Khorsandi is a petroleum engineer at Chevron. He received his PhD degree from Penn State University in 2016 for his research on mathematics of compositional displacements and holds an MSc degree from Sharif University of Technology and a BSc degree from Petroleum University of Technology in Iran. His research is in modeling and simulation of enhanced oil recovery, flow in porous media, phase behavior, and unconventional reservoirs. Dr. Khorsandi has published several papers in these areas and is a recipient of the 2020 SPE A Peer Apart Award.

Open Access

SPE has adopted a hybrid approach to open access publication with Open Access and traditional access-controlled articles.  
*Traditional access-controlled articles will continue to be accepted without processing fees.*

As of 1 January 2022, authors submitting to SPE journals (*SPE Journal, SPE Drilling & Completions, SPE Production & Operations,* and *SPE Reservoir Evaluation & Engineering*) may choose to pay an article publication charge (APC) of USD 2,500.00 for Open Access. SPE members receive a USD 500.00 discount on the APC (USD 2,000.00). Authors from low and lower-middle income economies (Group A and B; based on Research4Life’s classifications) will receive a 50% discount (USD 1,250.00). This cannot be combined with the SPE member discount. Payment is required after acceptance of the article for publication and must be received prior to online publication. Open Access articles will be published under a Creative Commons license term (CC-BY). To make clear the separation between scientific editorial decision-making and economic considerations, the option to publish an article under Open Access is offered to corresponding authors after peer-review and acceptance of an article for publication. If you would like your accepted paper to be Open Access, please contact peer@spe.org for information and payment processing.

**Author Responsibilities:** SPE cannot advise authors on compliance with any requirements placed on them by their funder or employer regarding open access publication. In all cases, the author must verify that their chosen route to publication is compliant.

Because copyright holders might have policies against commercial reuse, authors that wish to have their article published via the Open Access CC-BY license should check to be sure that any material they use in their article that was not created by them may be published under the CC-BY license. SPE cannot advise on these issues, nor undertake negotiations with rights holders on the author's behalf. Also, authors are still bound by SPE’s Publication Policies; the Creative Commons licenses are not an endorsement for duplicate publication.
Thank You to Our 2021 Reviewers

SPE Journal extends its sincere appreciation to everyone who provided a technical review for at least one paper during 2021. Many of our reviewers contributed their expertise to more than one paper during the year. We recognize the time commitment these individuals have made in agreeing to review papers and appreciate the impact that their efforts have had on the published papers throughout the year. Volunteers such as these individuals are essential to ensuring that the journal publishes manuscripts of high quality and lasting value. Thank you to our dedicated reviewers for their contributions.

Editor-in-Chief:

Birol Dindoruk, University of Houston

Executive Editors:

Roberto Aguilera, University of Calgary
Luis Ayala, The Pennsylvania State University
Reza Fassihi, BHP Billiton
Saeid Khorsandi, Chevron
Knut-Andreas Lie, SINTEF (Special Issue Guest Editor)

Associate Editors:

I. Yucel Akkutlu, Texas A&M University
Faruk O. Alpak, Shell
Steffen Berg, Shell Global Solutions
Shengli Chen, Louisiana State University
Yuguang Chen, Chevron
