

Drilling and Completion Technologies

1–18

SPE-210601-PA (Direct to Peer)

A Pressure-Driven Hole Cleaning Model and Its Application in Real-Time Monitoring with Along-String Pressure Measurements

F. Zhang and A. Islam

19–31

SPE-212264-PA (Direct to Peer)

Monitoring Evolution of Temperature and Strain in Cement Sheath Using Embedded Optical Fiber Bragg Gratings

S. Chen, J. Z. Jin, J. Shen, X. Guo, and L. Wang

32–48

SPE-204084-PA (Open Access)

Automatic Measurement of the Dependence on Pressure and Temperature of the Mass Density of Drilling Fluids

E. Cayeux

49–63

SPE-212263-PA (Direct to Peer)

A Combined Thermal Spallation and Melting Technology by Plasma Jet for Deep and Hard Rock Reservoirs

Q. Sun, Y. Liu, Z. Shen, Y. Han, Q. Wang, and P. Liu

64–79

SPE-212278-PA (Direct to Peer)

Study on the Key Issue in the Application of Nanoemulsions in Preflush Spacer: Contamination of Cement Slurry by Nanoemulsions

C. Wang, R. Meng, Z. Chen, S. Yang, S. Chen, Y. Yu, and J. Jin

Reservoir Modeling and Simulation

80–96

SPE-210594-PA (Direct to Peer)

Modeling Two-Phase Flow Caused by Hydrate Dissociation in a Reservoir on the Concept of Global Pressure

X. Deng, S. Han, H. Wang, Z. Wang, L. Li, and L. Yu

97–110

SPE-210587-PA (Direct to Peer)

Inverse Modeling of Reservoirs with Tilted Fluid Contacts

E. Dow, M. Szulczewski, A. Kashinath, S. Jayasinghe, U. Middy, and A. Dogru

111–129

SPE-206298-PA

Accurate Two-Phase Flow Simulation in Faulted Reservoirs by Combining Two-Point Flux Approximation and Mimetic Finite Difference Methods

R. Dong, F. O. Alpak, and M. F. Wheeler

130–146

SPE-212274-PA (Direct to Peer)

A Novel Analytical Model for Steam Chamber Rise in Steam-Assisted Gravity Drainage

C. Huang, S. Zhang, Q. Wang, H. Wang, H. Huang, and X. Deng

147–172

SPE-210588-PA (Direct to Peer)

Simultaneous Optimization of Well Count and Placement: Algorithm, Validation, and Field Testing

F. O. Alpak

Production and Facilities Engineering

173–183

SPE-210596-PA (Direct to Peer)

Deposit Prevention of Mineral Scales Using a Universal Dispersant of Carboxymethyl Cellulose

S. Ko, Y. Zhao, X. Wang, Z. Dai, S. Paudyal, C. Dai, A. Kan, and M. Tomson

184–200

SPE-210604-PA

An Indirect Approach for Flow Pattern Transition Identification Inside a Low-Specific-Speed Centrifugal Pump with Experimental Verification and Theoretical Modeling

Y. Li, J. Zhu, H. Zeng, Y. Zhang, Y. Lu, Y. Fan, and H. Zhu

201–214

SPE-209476-PA

Large-Scale Pipe Flow Experiments for the Evaluation of Nonchemical Solutions for Calcium Carbonate Scaling Inhibition and Control

J. B. R. Loureiro, A. L. Martins, A. S. Gonçalves, B. G. B. Souza, H. E. P. Schluter, H. F. L. Santos, B. B. Castro, I. M. Pepe, L. C. S. Soares Junior, G. G. Demetino, L. L. O. Soares, C. E. T. Silva, and M. V. D. Ferreira

215–225

SPE-212286-PA (Direct to Peer)

A New Ultrasonic Reactor for CaCO₃ Antiscaling in Pipelines and Equipment

C. E. T. da Silva, L. L. de O. Soares, L. G. Pereira, A. A. Cavalcante, A. R. A. Achy, V. L. Filardi, V. P. Ferreira, R. A. Fiuza Junior, B. B. Castro, T. F. Paes, and I. M. Pepe

EOR/IOR Applications

226–238

SPE-210578-PA (Direct to Peer; includes Supplemental Materials)

Coreflood-on-a-Chip Investigation of Oil Bank Formation in Low Interfacial Tension Chemical Floods at Favorable and Unfavorable Viscosity Ratios

L. Mejia, Y. Du, and M. T. Balhoff

239–250

SPE-210589-PA (Direct to Peer)

Pore-Scale Modeling of Immiscible Displacement in Porous Media: The Effects of Dual Wettability

L. Cha, Q. Feng, S. Wang, S. Xu, and C. Xie

251–267

SPE-209347-PA

Reinjection of Produced (Sheared) Polymer in a Canadian Viscous Oil Reservoir: Considerations to Improve Economics and Reduce Carbon Footprint

P. Ghosh, R. R. Wilton, A. Bowers, T. O'Brien, Y. Cao, C. Wilson, M. Ould Metidji, G. Dupuis, and R. Ravikiran

268–278

SPE-212282-PA (Direct to Peer)

Coreflooding Evaluation of Fiber-Assisted Recrosslinkable Preformed Particle Gel Using an Open Fracture Model

S. Zhao, A. Al Brahim, J. Liu, B. Bai, and T. Schuman

279–288

SPE-209460-PA

A New Logistically Simple Solution for Implementing Alkali-Surfactant-Polymer/Alkali-Cosolvent-Polymer in Difficult Environments: Evaluation of Concept with High Total Acid Number Viscous Crude Oil

J. G. Southwick, N. Upamali, M. Fazelalavi, U. Weerasooriya, C. Britton, and R. M. Dean

289–300

SPE-200412-PA

Simulation of Polymer Injection in Granular Media: Implications of Fluid-Driven Fractures, Water Quality, and Undissolved Polymers on Polymer Injectivity

Z. Li, D. N. Espinoza, and M. T. Balhoff

PVT and Fluid Characterization

301–318

SPE-206171-PA

Phase Behavior and Physical Properties of Dimethyl Ether/CO₂/Water/Heavy Oil Systems under Reservoir Conditions

D. Huang, Y. Li, and D. Yang

Data Analytics Applications

319–341

SPE-210563-PA (Direct to Peer; Open Access)

A Bayesian Optimization Approach to the Simultaneous Extraction of Intrinsic Physical Parameters from T_1 and T_2 Relaxation Responses

R. Li, I. Shikhov, and C. Arns

342–354

SPE-208962-PA

A Machine Learning Approach to Real-Time Uncertainty Assessment of SAGD Forecasts

S. Hunyinbo, P. Azom, A. Ben-Zvi, and J. Y. Leung

355–370

SPE-212273-PA (Direct to Peer)

Detection Performance and Grading-Selection-Based Inversion of Low-Frequency Alternating Current Resistivity Logging in Moderate-High Resistance Formations

Y. Wu, Y. Fan, L. Cai, Z. Fang, and C. Li

371–380

SPE-212265-PA

Downhole Pressure Prediction for Deepwater Gas Reservoirs Using Physics-Based and Machine Learning Models

J. He, M. Avent, M. Muller, and L. Bordessa

381–400

SPE-212290-PA (Direct to Peer; includes Supplemental Materials)

Multistep Ahead Multiphase Production Prediction of Fractured Wells Using Bidirectional Gated Recurrent Unit and Multitask Learning

X. Li, X. Ma, F. Xiao, C. Xiao, F. Wang, and S. Zhang

Advances in Unconventional Reservoir Development (Shale, Heavy Oil, Hydrates)

401–414

SPE-210595-PA (Direct to Peer)

Development of a Generalized Experimental Methodology for Investigating the Role of Steam Quality on Steamflooding Performance

X. Sun, C. Wei, Q. Zhang, J. Cai, X. Wang, Y. Wang, and Y. Zhang

415–428

SPE-210602-PA (Direct to Peer)

A Novel Approach to Predict Sand Production Rate through Gravel Packs in Unconsolidated Sediment Applying the Theory of Free Fall Arch

M. Qi, Y. Li, R. Ghanbar Moghanloo, C. Liu, J. Wang, C. Liu, N. Wu, and J. Sun

Special Topics in Petroleum Engineering

429–445

SPE-210597-PA (Direct to Peer; includes Supplemental Materials)

Efficiency of an Inverted-Shroud Gravitational Gas Separator: Effect of the Liquid Viscosity and Inclination

P. J. Miranda-Lugo, Marcel C. Barbosa, L. Enrique Ortiz-Vidal, and O. M. H. Rodriguez

446–461

SPE-212279-PA (Direct to Peer)

Stress State Change and Fault-Slip Tendency Assessment Associated with Gas Injection and Extraction in the Hutubi (China) Underground Gas Storage

G. Gao, C. Chang, C. Wang, Y. Li, and J. Jia

Editorial Notes

SPE Journal covers novel theories and emerging concepts (not including review articles or multi-part articles) spanning all aspects of engineering for oil and gas exploration and production, including drilling and completions, geomechanics, production and facilities, oilfield chemistry, CO₂ sequestration and injection, reservoir evaluation and engineering, numerical simulation, data analytics, economics and externalities including health, safety, environment, and sustainability.

Editor-in-Chief: Birol Dindoruk, University of Houston

Executive Editors: Zoya Heidari, The University of Texas at Austin; Saeid Khorsandi, Chevron; and Gary Teletzke, ExxonMobil (retired)

Time to First Decision: 29 days

Impact Factor: 3.602

CiteScore: 6.8

Scopus Rank: #28/203 (86th Percentile)

Category: Geotechnical Engineering and Engineering Geology

The *SPE J.* editorial board and staff thank outgoing executive editors **Reza Fassihi**, BHP Biliton, and **Luis Ayala**, Pennsylvania State University, for their invaluable service to the journal and welcome **Zoya Heidari** and **Gary Teletzke** as incoming executive editors.

Dr. Heidari is an associate professor in the Hildebrand Department of Petroleum and Geosystems Engineering at The University of Texas at Austin (UT Austin). Before joining UT Austin, she was an assistant professor at Texas A&M University from September 2011 to August 2015. She was the founder and the director of the Texas A&M Joint Industry Research Program on “Multi-Scale Formation Evaluation of Unconventional and Carbonate Reservoirs” from 2012 to 2015. She has been the founder and the director of the UT Austin Industrial Affiliates Research Program on “Multi-Scale Rock Physics” since 2016. She received a PhD (2011) in petroleum engineering from UT Austin. She is one of the recipients of the 2021 SPWLA Distinguished Technical Achievement Award, the 2020 SPWLA Young Professional Technical Award, the 2019 EAGE Arie van Weelden Award, the 2019 AIME Rossiter W. Raymond Memorial Award, the 2019 SPE Distinguished Membership Award, the 2019 Departmental Teaching Award from the Hildebrand Department of Petroleum and Geosystems Engineering, the 2017 SPE Cedric K. Ferguson Medal, the 2016 SPE Regional Formation Evaluation Award, the 2015 SPE Innovative Teaching Award, the 2014 TEES Select Young Faculty Fellows Award from the College of Engineering at Texas A&M University, and the 2012 SPE Petroleum Engineering Junior Faculty Research Initiation Award. She has been the holder of Anadarko Petroleum Corporation Centennial Fellowship #1 in Petroleum Engineering at UT Austin since 2016. She has published more than 210 papers in peer-reviewed journals and conference proceedings. She served as the Vice-President of Education for the SPWLA from 2016 to 2018 and a member of the SPE reservoir advisory committee since 2022. She has also served as an executive editor for *SPE Journal* since 2022 and an associate editor for *SPE Reservoir Evaluation & Engineering* and *Geophysics* and has been engaged in many other activities serving petroleum engineering and geosciences professional communities. Her research interests include petrophysics, rock physics, multi-scale formation evaluation, borehole geophysics, integrated reservoir characterization of carbonates and unconventional resources, and completion petrophysics.

Dr. Teletzke retired in 2021 from ExxonMobil Upstream Research Company as Senior Technical Advisor for Enhanced Oil Recovery and Geologic Carbon Storage. During his 38-year career at ExxonMobil he led research projects related to gas injection EOR, chemical EOR, compositional reservoir simulation, and research opportunity identification. He also led

several EOR field studies, integrating laboratory work, reservoir simulation, and field pilot testing. Over the past 15 years, he has provided technical leadership to ExxonMobil's efforts on geologic carbon storage. He has published more than 50 technical papers and patents. He is an SPE Distinguished Member and currently serves as executive editor for *SPE Journal*. He previously served as an SPE Distinguished Lecturer during the 2018-19 season, executive editor of *SPE Reservoir Evaluation & Engineering* from 2014–17, and on the organizing committees for numerous SPE conferences, workshops, and forums. He received a BS degree in chemical engineering from Northwestern University and a PhD in chemical engineering from the University of Minnesota.

ORCID iD

Starting January 2023, SPE will require authors and co-authors to use an ORCID number to submit papers to conferences and journals. ORCID, Open Researcher and Contributor ID, is a widely accepted unique identifier for researchers/authors that allows authors to own and control their content and distinguishes authors from every other researcher.

Add your ORCID iD by going to your user profile in ScholarOne and selecting the "Email/ Name" page. Learn more at <https://www.spe.org/en/authors/resources/orcid/>.

Thank You to Our 2022 Reviewers

SPE Journal extends its sincere appreciation to everyone who provided a technical review for at least one paper during 2022. Many of our reviewers contributed their expertise to more than one paper during the year. We recognize the time commitment these individuals have made in agreeing to review papers and appreciate the impact that their efforts have had on the published papers throughout the year. Volunteers such as these individuals are essential to ensuring that the journal publishes manuscripts of high quality and lasting value. Thank you to our dedicated reviewers for their contributions.
